

Some straight talk about . . .

# Dance Nesting - Stack Chair

*Flexible storage. Mobility. Articulating back.*

Dance offers an irresistible combination of benefits, beginning with its articulating back for great comfort. Follow that up with the flexibility of two methods of

storage: nesting - thanks to its flip-up seat - or stacking. Dance's high mobility is due to its optional casters and its lightweight aluminum frame.

Dance is offered with either casters or glides. The plastic back is available in black and warm grey, plus three fun colors.

Select either arm or armless models. Both versions will nest and stack.

Eliminate the need for a stacking dolly by placing a caster-based Dance chair on the bottom of the stack.
