

DuraLite™ Tables

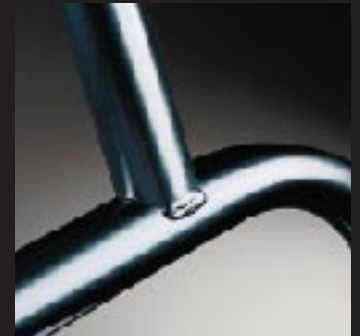

You operate in a world that demands relentless strength and durability, a world where tables must endure heavy use. That is why KI developed DuraLite™, the most durable, lightweight folding table available. Easily carried by one person, DuraLite folding tables can outlast the toughest demands of daily set up. Perfect for convention centers, hospitality settings or educational facilities, DuraLite exceeds stringent tests for leg strength, weight load and vertical drops on to hard surfaces. In fact, the ABS top shell, honeycomb

DuraLite holds a ton of weight; 2000 lbs. evenly distributed. That's 25% more than Mity-Lite's™ advertised 1600 lbs.

Shockproof corner defies damage upon impact from 2 ft. vertical corner drops.

- 1) Honeycomb core
- 2) Sonically welded edges
- 3) Molded corner cover
- 4) Aluminum beam structure
- 5) Leg pad attached to aluminum beam
- 6) .080 thick co-extruded ABS top shell
- 7) .095 thick co-extruded ABS bottom shell

The force of 500 lbs. of concentrated weight in a 24" x 24" area is easily supported, perfect for heavy ice sculptures.

core and aluminum internal support structure provide unprecedented, weight bearing strength. Top and bottom shells are even ultrasonically welded around the perimeter, sealing out moisture while providing integrity to the top structure. DuraLite's usability is another reason it surpasses all others. Lighter weights, replaceable corner covers, a top surface which defies hotter temperatures than competitors' tables and greater weight bearing strength are all thanks to exclusive innovations in manufacturing design.

Wide-mouth welds provide the integrity of full size leg tubing and anchor frame for strength. Far superior to leg styles that are just crimped and welded or riveted together.

DuraLite folding tables can be carried by one person, perfect for easy, cost efficient set up for banquets, seminars or catered events. That means each time you set up a DuraLite lightweight folding table, you save on labor costs and time. The lightweight design even diminishes the risk of back injuries from overexertion, promoting productivity and employee wellness. The exclusive corner design features a field replaceable, high-impact polycarbonate corner cover to protect the table corners from damage upon impact.

Adjustable legs with a remarkable 11" height range in one-inch increments can be lowered to 23-3/4" for small children or raised to 29-3/4" for standard use, 31-3/4" for ADA compliance or 34-3/4" to serve as a buffet table. A spring loaded safety-lock ensures easy adjustment and stability.

Cap-style foot protects table leg in heavy use or insert style cap offers a sleek design aesthetic; both are non-marring.

Perfect for catering, piping hot temps of 210 degrees Fahrenheit will not damage the surface. Most other tables only endure 160 degrees.

Should a corner cover ever become damaged, a replacement kit can make the table look like new.

The smooth ABS surface is easy to write on, perfect for seminars or testing.

Weight Comparison in Pounds			
Size	DuraLite	Mity-Lite™ ¹	Palmer-Snyder ²
30x72"	39	41	47
30x96"	49	50	54
60" diameter	47	59	49
72" diameter	64	82	78

But what's the secret? It's DuraLite's unique honeycomb core, aluminum framework and superior materials. The hexagonal, airy structure of the honeycomb is amazingly strong. Plus, the tough ABS top shell is over 30% thicker than Mity-Lite™ and the bottom shell is almost twice as thick for greater structural integrity. Also noteworthy is that the unique design of DuraLite is over 40% lighter than standard folding tables and weighs less than most other competitors' lightweight tables. The top surface is designed

Strong metal-to-metal leg attachments provide maximum holding power and insure screw holes won't strip, which can happen with tables that screw into wood. Legs are easily replaceable if needed.

Rubber bumpers protect tables when stacked and keep tables in place on dollies.

Smooth, snag-free 3/4" edge accommodates standard skirting clips.

to be as smooth as possible, perfect for student use. It is easy to sanitize for food service, yet conceals scratches and fingerprints.

C-shaped gravity lock is durable, safe and easy to use. It will not bind in the folding mechanism like other competitor tables.

Available in round, rectangular or serpentine shapes, DuraLite tables can be stacked on dollies for storage and transport. With a Ten-Year Warranty, double that of Mity-Lite™, Virco®, Howe, or Palmer-Snyder, DuraLite is by far the best in the industry. DuraLite...all other tables are just lightweights!
