

Engage Seating. One size doesn't fit all. One chair does.

- It adjusts to your body.
- It adapts to your tasks.
- It even fits your budget.

WORKING  
FOR  
YOU

■ One size doesn't fit all. One chair does.

## Engage Seating:

There are four things you need to know before you sit down.

One.

This is a ridiculously comfortable task chair.

Two.

Our competitors don't think it costs enough.

Three.

You can adjust it without a Ph.D. in ergonomics.

Four.

It fits the look of your office as well as it fits you.

**It adapts to your tasks.**

**Variable back angle lock**  
The chair's back locks in three different positions to support you for the task at hand.

**Forward seat tilt**  
Lean forward in a work-intensive position. Open the forward seat tilt. Your seat leans with you to reduce pressure on your legs.

**Synchro-Tilt**  
Lean back. Lean forward. Sit up straight. The smooth action of the patented Synchro-Tilt supports you all the way.

**Pivoting arm cap (Optional)** – Angle the arm caps in or out for better support when keystroking or "mousing". When you want them out of the way, they pivot 180°.

■ **The new standard in comfort – now standard for everyone.**

Highly engineered, incredibly ergonomic task chairs have reached new heights of comfort. Comfort like that usually comes at a premium price.

Not anymore.

At KI, we took the best thinking in ergonomics. Then, applied it to a chair that would fit almost any budget. Gave it a clean, crisp look that would fit any office. Plus, we made it so simple to adjust that it can fit virtually any body type.

The new KI Engage chair. By Giancarlo Piretti. Because the new standard in comfort should be standard for everyone.

**It adjusts to your body.**

**Back height adjustment**  
Position the chair's back where it best supports your own.

**Pneumatic seat height**  
Adjust the seat to fit your height for maximum comfort.

**Height adjustable arms (Optional)** – Raise them. Lower them. And, if they're ever in the way, drop them out of sight at the touch of a button.

**Tilt tension adjustment**  
Dial in just the amount of support you need using the simple control near the front of your seat.

**Seat depth adjustment**  
Slide the seat forward or backward until it's the perfect depth for your height and leg length.

■ **Now, take a seat. And, let your body decide.**

Try it. Try it. Try it.

Check out our web site.  
Call for more information.  
But, whatever you do, try  
the chair.

Then, make it yours.

Choose from standard KI  
fabrics. Pallas Textiles or  
C.O.M. All kinds of color  
and texture and life.

**You make the rules.  
We make the rest.™**

Of course KI solutions work better for you. They're made for you. No one pays more attention to customer needs than we do. We don't design our furniture to win awards (even though it does). We don't rely on one-size-fits-all solutions (even though they would make our life easier). We find out what the market needs. And, we make it. The same applies to our service, distribution...everything we do. KI solutions work, because we're working for you.
