

Creating new access to power and data.

- Press down to open the module.
- Plug in to superior power distribution.
- Hook up to easy-access data ports.

**WORKING  
FOR  
YOU**

■ All the right connections.

**Power/data module**

Modules feature an innovative press-release cover for easier opening and closing. Each module encloses one 110-volt duplex receptacle (two power outlets) and two data ports that can be shared by two laptop users. KI's patented design allows data jacks to remain stationary to prevent wear and tear at connections.

**PowerUp system components**

The PowerUp system offers five different levels of componentry based on individual preference and the KI product specified. Central to all levels is the power/data module. Shown is a sophisticated Fixed Seating solution that provides power/data modules coupled with an 8-wire electrical system, a hard-wired power infeed and wire management with metal power/data dividers.

**Press-release opening**

Module covers open automatically with a simple press-release action. Opens smoothly. Shuts securely.

**University™ seating or Seminar™ tables with the PowerUp system**

For fixed seating applications, an eight-wire, four-circuit pre-wired harness is wired to the building power source and handles up to 24 laptops or 12 PC's per power infeed. PowerUp components are completely enclosed below the worksurface within durable, tamper-resistant troughs and shrouds. Only the access module is visible on the worksurface.

**Connect™ system**

This single-circuit 15-amp Connect system can power up to six laptops or three PC's. It simply plugs into a standard power outlet source (no need for an electrician) and links up to six modules. Maximum configurability. UL listed for safety.

■ In all the right places.

In lecture halls...

In libraries or resource centers...

In classrooms...

In training rooms...

In conference rooms...

In offices...

Power/data when you need it...where you need it. Computer-based training rooms. Interactive classrooms and lecture halls. Connected libraries and resource centers. High-tech conference rooms. Efficient, productive offices and residence halls.

The innovative PowerUp system makes power and data access easy and discrete. A power module mounts onto a comprehensive variety of worksurfaces (desking systems, powered tables, fixed tables, mobile tables, or folding tables). This superior distribution system offers a multitude of power and data access solutions depending on your needs.

Easy open. Easy close. Easy connection. Modules feature innovative covers with user-friendly press-release action. Each module encloses one duplex receptacle (two power outlets) and two readily accessible data ports. Data jacks remain stationary to prevent excessive wear and tear on data connections.

Safe. Durable. Discrete. The PowerUp system has it all. It's UL listed to ensure safety. It's built to last and backed by a 10-year warranty.

**You make the rules.  
We make the rest.™**

Of course KI solutions work better for you. They're made for you. No one pays more attention to customer needs than we do. We don't design our furniture to win awards (even though it does). We don't rely on one-size-fits-all solutions (even though they would make our life easier). We find out what the market needs. And we make it. The same applies to our service, distribution...everything we do. KI solutions work, because we're working for you.
