

Uniframe® Round Tables
with Seating

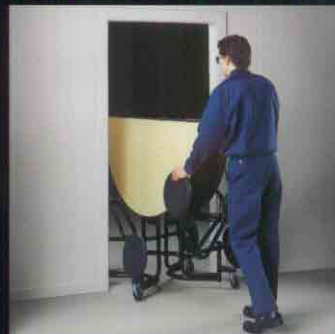

Today's school cafeterias are more than just a place to eat. Students interact and share ideas during lunchtime. Precious space is used for evening meetings and conferences. Cafeterias must adjust to all these needs quickly, safely and easily. ■ Safe, easy operation and mobility, easy rearrangement, easy storage and easy room cleaning make Uniframe Round Tables with Seating the easy choice. Ensure easy ownership and the lowest lifecycle costs with KI's industry-leading, ten-year warranty. Rely on superior strength and durability

(below left) Like other Uniframe tables, Uniframe Round Tables with Seating are the easiest to operate...bar none! Fingertip control and effortless folding are the result of KI's exclusive combination of pneumatic lift assist and torsional energy storage system. No fuss, no effort, just efficient use of space without any hassles.

(below right) To ensure safety and convenience, KI's exclusive storage lock system engages automatically when the table is folded. Since it is easily accessible, the storage lock can be released from either side of the table.

(below left) To provide greater strength, durability and stability than competitors' plastic sleeve and pin style stools and to eliminate field installation requirements, KI attaches stools to a heavy, 8-gauge metal plate before shipping.

(below right) Avoid scuffed shoes as well as trapped dust, dirt or food with the sleek, tamper-resistant caster cover. Add stability and maneuverability, which prevent tipping, with KI's carefully engineered caster design.

(above left) For durability and high value, choose the vinyl bullnose edge. For superior edge protection, choose KI's exclusive Perfect Edge. Perfect Edge prevents bacterial build-up by permanently sealing the top to prevent liquid or food particles from permeating the top core. Its superiority is ensured by KI's lifetime warranty.

(above right) Eliminate the need to straddle table leg uprights and also allow easy entry and egress with Uniframe's seat support design. This design provides aesthetic continuity with other Uniframe tables with seating...a unique KI benefit.

with Uniframe's unitized all-steel frames. ■ Perfect for interactive environments, these 60" round tables are available in two different heights with your choice of eight stools or four benches. Brighten food service settings with the widest selection of colors and finishes. Stools are made of polypropylene or optional thermoset "hard plastic". Frames are black enamel coated or duplex nickel-chrome plated with non-marring nylon or stainless steel glides.

(above left) Assure safe operation and keep tables safely in the open position with Uniframe's gravity down-lock. It automatically engages into slots in the hinges and easily releases from either side. Prevent pinched fingers with Uniframe's pinch-free center hinges and sufficient clearance between top halves.

(above right) Discourage children from climbing and minimize dust build-up during storage with stool seats that store parallel to the tabletop. Uniframe Round Tables with Seating move safely through standard door openings, unlike competitors' tables.
